

low noise wide band pdf

A low-noise block downconverter (LNB) is the receiving device mounted on satellite dishes used for satellite TV reception, which collects the radio waves from the dish and converts them to a signal which is sent through a cable to the receiver inside the building.

Low-noise block downconverter - Wikipedia

At MACOM we design, manufacture, and support a range of low noise amplifiers for RF, microwave, and millimeter wave applications. The low noise amplifiers cover a frequency range of 20 MHz to 86 GHz operation for a wide range of applications, including network infrastructure, radar and communication systems.
