Complexity characterises the behaviour of a system or model whose components interact in multiple ways and follow local rules, meaning there is no reasonable higher instruction to define the various possible interactions.. The term is generally used to characterize something with many parts where those parts interact with each other in multiple ways, culminating in a higher order of emergence ...

Product sale. Customer outcome: business customers will only be provided with a product that is deemed affordable and which meets the requirements of the business. Firms will achieve this: with systems and controls that ensure the sales process, training and incentives promote the right behaviours and direct their employees, or their agents, to deliver the right customer outcome.
