Optoelectronic Devices Advanced Simulation And Analysis

Advanced software tools have been developed for optoelectronic devices and several commercial software providers have emerged. These tools enable engineers and scientists to design and understand ever-more sophisticated nano-structure devices. The specific challenge of optoelectronic device simulation lies in the com-

physics and simulation of optoelectronic devices xiii

Optoelectronic devices transform electrical signals into optical signals and vice versa by utilizing the sophisticated interaction of electrons and light within micro- and nano-scale semiconductor structures. Advanced software tools for design and analysis of such devices have been developed in recent years.

factors are especially significant for opto-electronic, radio frequency, and high speed devices whose performance depends on their interconnect, layout, and parasitic components. This work describes the application of device simulation to opto-electronic and high frequency device design. It begins with a

MIXED CIRCUIT AND DEVICE SIMULATION OF OPTO-ELECTRONIC

Optoelectronic devices transform electrical signals into optical signals (and vice versa) by utilizing the interaction of electrons and light. Advanced software tools for the design and analysis of such devices have been developed in recent years. However, the large variety of materials, devices, physical mechanisms, and modeling approaches often makes it difficult to select appropriate ...

10 GaN-based Light-Emitting Diodes 295. 10.3 Models and Parameters. We employ the simulation software APSYS [5], which self-consistently combines the 3D simulation of carrier transport, self-heating, spontaneous photon emission, and optical ray tracing. The code was significantly improved during our investigation to provide more realistic results.

10 GaN-based Light-Emitting Diodes - NUSOD

The current need to apply advanced design software in optoelectronics follows the trend observed in the 1980's with simulation software for silicon devices. Today, software for technology computer-aided design (TCAD) and electronic design automation (EDA) represents a fundamental part of the silicon industry.
