Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

I remember the days when getting ready for school resembled a spoof on a boot-camp exercise. I was the reluctant drill sergeant trying to direct two giggling ornery monkeys. Virginia was starting kindergarten, and Sofia was beginning first grade in a new school. We had just moved to New York, Mark was still a newborn,
